Precipitation probability					
40%	40%	40%	40%	30%	10%

Forecast for Tuesday 28 Mar 2023

Weather: Cloudy, with rain soon spreading east to all parts. Rain is likely to be heaviest by late morning with some drier interludes possible further east, perhaps a few cloud breaks here later too. Although the main band of rain will clear east during by late afternoon it will remain damp and drizzly for some areas into the evening, possibly some evening brightness in the south.

Chance of cloud-free hill tops above 600m: 60% falling to 20% or less in the afternoon as cloud lowers in association with the band of rain moving across the area.

Low cloud and visibility: Patchy or scattered low cloud layers above 500m in the morning, mainly confined to southern and western high ground at first. Cloud will thicken and lower with layers above 300m in the afternoon. It will become extensive during the day with visibility becoming quite poor and navigation will become quite tricky at height. Some brighter spells may be found in the east later in the afternoon with cloud tending to thin and lift during the evening.

Forecast for Wednesday 29 Mar 2023

Weather: Cloudy but mainly dry in the morning and the possibility of a few brighter spells, although some mist around the area will be hard to clear. Cloud and rain spreading east from late morning with heavy rain at times through the afternoon. Dry for a time by late afternoon but further showers possible during the evening.

Maximum wind: Southerly 15 gust 25 mph increasing during the afternoon to 25 mph gusts 35 mph.

Chance of cloud-free hill tops above 600m: 70% falling to 40%, improving again later, cloud coming and going from the summits during the day.

Low cloud and visibility: Patchy or scattered cloud above 500m in the morning becoming broken layers above 300m in the afternoon, chance of some brighter conditions and cloud free summits in the morning before the rain arrives however early morning cloud may be slow to clear. Cloud may also clear later in the afternoon with some temporary dips in visibility in evening showers.

Temperature: **Valleys:** Plus 12 Celsius.
At 600m: Plus 8 Celsius.
Freezing level: Above all summits
